

BRIAN MATHEW

AI Application Developer · Full-Stack Developer · Junior Software Developer

New Jersey · (609) 815-1685 · mathew.brian@gmail.com · bmath8.vercel.app · github.com/bmath8 · linkedin.com/in/brian-mathew-66235556 · Remote / Hybrid / On-site / Relocation

SUMMARY

Full-stack developer who ships real, working products. I design, build, test, and deploy AI-powered web applications end to end - Python and TypeScript, React/Next.js front ends, Flask/Node back ends, LLM integrations, and CI/Docker deployment. Fast, test-driven, and I own an idea from first commit to running software across the full stack.

TECHNICAL SKILLS

Languages & Frameworks: Python · JavaScript · TypeScript · SQL · React · Next.js · Node.js · Flask · Git/GitHub version control · Docker · Windows · PowerShell · full stack web development · code review · problem solving

Backend & Tooling: SQLAlchemy · Postgres/Supabase · Redis · REST APIs · WebSockets · pytest · Jest/RTL · CI/CD · Firebase · HTML/CSS

AI: LLM app development (OpenAI · Anthropic · Ollama) · prompt engineering · RAG · AI agents · LLM evaluation & critique · RLHF-style feedback

EXPERIENCE

Independent Software Developer / AI Application Developer | New Jersey 2025 - Present

- **Brian OS** — a native-Windows AI agent fleet in Python: 26 scheduled agents, local-LLM (Ollama) routing, Telegram control, structured shared state, self-healing health checks, and an 81-test suite, with draft-only guardrails requiring approval before anything sends, spends, deploys, or deletes. github.com/bmath8/brian-os
- **Super Bowl LX Squares** — a live real-time Super Bowl Squares web app (React + Firebase Realtime DB) that ran a real event: 100-square grid, randomized draw, live score sync, chat, host controls, and a security write-lock. fam-super-bowl-squares-2026.vercel.app
- **Boombox** — a real-time social music app on Next.js/React/TypeScript with a Supabase data layer, Spotify integration, and a Node WebSocket + Redis Pub/Sub backend; typed validation, Jest/RTL tests, Docker Compose, and documented security architecture. github.com/bmath8/boombox
- **AI Job Hunter** — a Python/Flask application that analyzes job descriptions, tailors resumes to a posting, scores keyword alignment, drafts cover letters, and tracks applications; provider-agnostic AI integrations, SQLAlchemy, Docker + Render deploy config, and 80 automated tests.

Driver, Independent Contractor | Uber · New Jersey 2022

- Delivered customer-facing service across high trip volume, independently managing navigation, scheduling, safety, and time-sensitive problem-solving with professional communication.

Appliances Department Lead | Best Buy

- Early sales leadership role: customer advising, issue resolution, and team support in a high-volume retail environment.

EDUCATION

Penn State Berks - Undergraduate coursework · The City College of New York - Undergraduate coursework
