

BRIAN MATHEW

AI Application Developer · Full-Stack Developer · Junior Software Developer

New Jersey · (609) 815-1685 · mathew.brian@gmail.com · bmath8.vercel.app · github.com/bmath8 · linkedin.com/in/brian-mathew-66235556 · Remote / Hybrid / On-site / Relocation

SUMMARY

Full stack developer who ships AI-powered applications and then operates them. Four systems you can open right now: a warranty tracker usable in five seconds with no account, a 28-agent Windows automation fleet with 226 passing tests running unattended daily, a real-time event app that went live in front of an audience, and a WebSocket/Redis music platform. Python and TypeScript, React front end to Flask/Node back end - every claim below is a link you can click or code you can read.

SELECTED PROJECTS

Brian OS — Windows AI agent fleet 2026 - Present

- Native-Windows AI agent fleet: 28 scheduled agents, local-LLM routing via Ollama, Telegram control, shared state and self-healing health checks - with draft-only guardrails requiring approval before anything sends, spends, deploys or deletes.

Python · Windows · PowerShell · Ollama · Telegram API · pytest · 28 scheduled agents · 226/226 tests passing · github.com/bmath8/brian-os

Warranty Tracker — live local-first web app 2026

- Warranty tracker that works the moment the page loads - no account, no server, no sign-up. Automatic expiry math, colour-coded urgency, search and sort. One self-contained HTML file, zero dependencies, zero build step.

JavaScript · HTML/CSS · localStorage · Live · no account · zero dependencies · zero build step · warranty-tracker-azure.vercel.app

Super Bowl LX Squares — real-time event web app 2026

- Real-time squares pool that ran a live event in front of a real audience: 100-square grid, randomized draw, live score-driven winner resolution, chat and host controls behind a security write-lock.

JavaScript · React · Firebase Realtime DB · Vercel · Live and publicly usable · ran a real event · fam-super-bowl-squares-2026.vercel.app

ALSO WORKS WITH

Languages & Frameworks: TypeScript · SQL · Next.js · Node.js · Flask · Git/GitHub version control · Docker · full stack web development · code review · problem solving

Backend & Tooling: SQLAlchemy · Postgres/Supabase · Redis · REST APIs · WebSockets · Jest/RTL · CI/CD

AI: LLM app development (OpenAI · Anthropic · Ollama) · prompt engineering · AI agents · LLM evaluation & critique · RLHF-style feedback

EXPERIENCE

Independent Software Developer | New Jersey 2025 - Present

- Design, build, test, document and operate the systems above - sole builder on each, including the deployment and the day-to-day operation.

Driver, Independent Contractor | Uber · New Jersey 2022

- Customer service with calm, clear communication and reliable follow-through under time pressure.

Appliances Department Lead | Best Buy

- Early sales leadership role: customer advising, issue resolution, and team support in a high-volume retail environment.

EDUCATION

Penn State Berks - Undergraduate coursework · The City College of New York - Undergraduate coursework
