SUMMARY

Full-stack developer who ships real, working products. I design, build, test, and deploy AI-powered web applications end to end - Python and TypeScript, React/Next.js front ends, Flask/Node back ends, LLM integrations, and CI/Docker deployment. Fast, test-driven, and I own an idea from first commit to running software across the full stack.

EXPERIENCE

Independent Software Developer / AI Application Developer | New Jersey 2025 - Present

- **Built AI Job Hunter** - a Python/Flask app that analyzes job descriptions, tailors resumes to each posting, scores ATS keyword alignment, drafts cover letters, and tracks applications; provider-agnostic AI integrations, SQLAlchemy, full-stack architecture, Docker + Render deploy, and 80+ automated tests.
- **Architected Brian OS** - a native-Windows AI agent fleet in Python: 25 scheduled agents, local-LLM (Ollama) routing, Telegram control, structured state, self-healing health checks, and an 81-test suite, with draft-only guardrails requiring approval before anything sends.
- **Shipped Boombox** - a real-time social music app on Next.js/React/TypeScript with a Supabase data layer, Spotify integration, and a Node WebSocket + Redis Pub/Sub backend; typed validation, Jest/RTL tests, Docker Compose, monitoring.
- **Launched a live real-time Super Bowl Squares web app** (React + Firebase Realtime DB) that ran a real event: live score sync, chat, host controls, security write-lock.

Driver, Independent Contractor | Uber · New Jersey 2022

- Delivered customer-facing service across high trip volume, independently managing navigation, scheduling, safety, and time-sensitive problem-solving with professional communication.

Appliances Department Lead | Best Buy

- Early sales leadership role: customer advising, issue resolution, and team support in a high-volume retail environment.
