SUMMARY

Customer-focused technical builder with experience leading retail sales, coordinating small teams, and solving problems directly with customers. Built and tested working applications while developing hands-on skill in application troubleshooting, validation, APIs, and technical documentation.

01 SELECTED PROJECTS

Independent Projects | 2025–Present

AI Job Hunter — *truth-constrained application workflow*

- Built a Flask and SQLAlchemy application that turns job requirements and a base resume into review-ready application materials without inventing education, employment, or results.
- Separated generation, job-match analysis, validation, and application tracking so workflow problems can be isolated, tested, and corrected.

Brian OS — *Windows automation and operational recovery*

- Built an always-on Windows assistant that coordinates scheduled work, local AI tools, shared state, two-way commands, and approval-controlled actions.
- Diagnosed a failed process guardian that left orphan processes and exhausted disk space, restored monitoring, and added checks designed to prevent recurrence.

BoomBox — *real-time collaborative music prototype*

- Built a web product prototype for shared queues, collaborative playlists, and live room activity.
- Separated durable PostgreSQL data from transient WebSocket and Redis state so saved product data and live interactions have clear responsibilities.

02 SKILLS & CAPABILITIES

Support & Service: Application troubleshooting; issue reproduction; customer communication; technical documentation

Systems & Tools: Python; Flask; APIs; JSON; SQL; Git/GitHub; Windows

Quality & Operations: Application testing; route smoke testing; validation workflows; operational checks

03 CUSTOMER & OPERATIONS EXPERIENCE

Best Buy — Appliances Department Lead

Earlier Experience

- Led the appliances department during a year it ranked first in the territory for sales.
- Helped customers make high-consideration purchases by identifying their needs, explaining products clearly, and working toward department sales goals.

Uber — Independent Driver

2022

- Completed approximately one year of sustained, independent, customer-facing work while adapting to changing routes, schedules, and customer needs.

04 ADDITIONAL EDUCATION

Penn State Berks — Additional undergraduate study

The City College of New York — Additional undergraduate study
